

Math In College

Major Quiz Grade (25 points)

What math class should you take next year? Which math class will help you with your future career? (Should you take AP Calculus or AP Statistics?) You will explore college websites to find the math requirements required for your major.

1. Where would you like to attend college? Choose 2 schools—1 in Texas and 1 outside of Texas.
2. What is your preferred area of study? What would you like for your major? If you are not sure, choose a parent's major.

Explore each of the schools' web pages to find the university requirements for math classes. What math is required for your school and area of study?

That's it!

I must receive your emails by 9:00 AM on Thursday, March 22th

COPY/PASTE into e mail the following information below
